

Installation

- I. Copy the `ol_feedburner.php` file into your default WordPress plugin directory `wp-content/plugins/`
- II. Activate the plugin by logging into your WordPress administration area, going to 'Plugins', then clicking 'Activate' at the end of the 'FeedBurner Feed Replacement' row.
- III. Begin the configuration by going to 'Options' then clicking on the 'FeedBurner' submenu.
- IV. If your installation of WordPress is configured to update the `.htaccess` file automatically, you can skip this step. Otherwise, you will need to replace all the information in your `.htaccess` file with the text from the box. Once this is replaced and uploaded, continue on to the next step.
- V. Copy the randomly generated URI listed on the page. If you already have a FeedBurner account, simply update your feed URI with the one you just copied, otherwise simply paste the URI into the box on the FeedBurner homepage to get started creating your account.
- VI. Once your account is either created or updated, return to your WordPress administration page and enter your FeedBurner URI into the text box and click the button to continue.
- VII. Again, if WordPress can write to your `.htaccess` file, this step can be skipped. Otherwise, replace all the text in your `.htaccess` file with the text from the box, and re-upload your `.htaccess` file again.
- VIII. At this point, all your feed URIs should be redirecting to FeedBurner.

Deactivation

- I. To deactivate your feeds from forwarding to FeedBurner, return to the 'FeedBurner' submenu under 'Options' in your WordPress administration area.
- II. Click the button to deactivate the redirection.
- III. If WordPress is not configured to edit your `.htaccess` file, you will need to replace all the text in your `.htaccess` file with the text from the box, then reupload your `.htaccess` file.
- IV. FeedBurner redirection should now be deactivated.

IMPORTANT: Deactivating the Plugin on the 'Plugins' page does not immediately deactivate FeedBurner redirection. In order to completely disable redirection, you must follow the directions above.
